CCTV/Alarm/Automatic Door  
Installation  
Field Engineer

Jan 2020 – Feb 2022

Electrical Engineering  
Assistant Engineer

Jan 2019 – April 2019

Web Development  
Frontend Developer

May 2023 – Present

GLENTREE ENTERPRISES

Glentree deals heavily with installation and operation of security devices, including CTV cameras, access control, alarms, and automatic gates among others. While at the company, I: -

- Worked in a team that saw an increase of clients from an average of 6 to 10 clients per week. We achieved this through proactive work measure, including compromising personal schedules to meet work deadlines.
- Helped to increase work tracking through ensuring that my team written clear technical reports of all undertaken works for proper record-keeping.

NEW KCC – NYAHURURU

While at New KCC, I was heavily deployed to install, repair, and maintain lighting and electrical machines, including motors, refrigerators, milk pasteurizers, air compressors, and PLCs among others. I worked in a team that managed to: -

- Increase the company’s quick response to emergency breakdown of electrical machines.
- Improve security lighting within factory and servant quarter compounds.

FREELANCE

I have worked with clients from all over walks of design to design and develop their pixel-perfect, responsive, and accessible websites. Key skills employed included: -

- React.js
- Bootstrap
- Sass

PROFILE

I hold a degree in electrical and electronics engineering from the Technical university of Kenya. I have experience working as field engineer with a company dealing with installation of security devices, including CCTV cameras, access control systems, and alarms, among others. My goal is to provide electrical engineering expertise that will spur organization's success in achieving its goals.
